

0-19 Research Network: Yorkshire and the Humber

Bringing together those across Yorkshire and the Humber involved in or developing research that can strengthen the knowledge base relevant to school nursing and health visiting

**Are you a school nurse or health visitor with an interest in research?
Do you work in a public health role with 0-19s and have an interest in research?
Are you a researcher with an interest in, or undertaking, research relevant to school nursing and health visiting?**

Our goal is to see the growth in new research relationships that can strengthen research practice in health visiting and school nursing and support service delivery and innovation for 0-19s. In 2017 we will be running a series of meetings in Yorkshire and the Humber with the aim of increasing research engagement and research capacity of health visitors and school nurses and others working in 0-19 services. *These meetings are funded by the Y & H Clinical Research Network - and complement the North of England Health Visitor and Child Health Research Network which has been running since 2013.*

**The first meeting will be on
Wednesday 11th January 2017
11am-3pm at
The Bar Convent Conference Centre,
17 Blossom Street,
York YO24 1AQ**

We hope to welcome everyone interested in research - both new and experienced researchers

Lunch and refreshments will be provided

This is a free event but prior booking is essential. Please contact Liz Flower:

Elizabeth.Flower@shu.ac.uk

For further information about the network please contact Dr Sue Peckover: S.Peckover@shu.ac.uk
